SDI/BIOM

The SDI®/BIOM® System

The OCULUS BIOM® was a revolution in vitreoretinal surgery and forever changed fundus viewing, since its invention in the early 1990s.

Today the BIOM® product range provides the surgeon the advantage of choosing his preferred system type, manual or fully automatic. The components can be fitted to the vast majority of surgical microscopes used in ophthalmology.

Whether reusable or disposable, precision engineering for maximum accuracy is our philosophy for each device crafted by OCULUS.

BIOM® Optic Set

High-definition wide field front lens
and reduction lens
in single-use design

Modeled after the famous
WiFi HD Lens

Outstanding resolution in the periphery,
