Diabetic Retinopathy and Retinal Vascular Diseases

Diabetic retinopathy and other retinal vascular diseases are some of the most common causes of visual loss in both developed and developing countries. With the advances in technologies and treatment, updated classification and grading systems might be required. On the other hand, new imaging modalities such as OCT-A also have impacts on assessment of condition and management decisions. Furthermore, contact-free screening methods might be needed in the era of COVID-19 to reduce the chances of viral transmission. This symposium will cover the latest concepts and trends in management of diabetic retinopathy and retinal vascular diseases.

- 6. Kindly note that only delegates, who have completed the registration and payment process, will be able to view the "join the session" link. You may check your registration and payment at https://congress.apvrs.org/
 - a. To be considered as a successful registration, you will need to select your badge category and settle your registration payment. You are also strongly recommended to watch the walk-through tutorial video <u>here</u> to learn more about navigating the APVRS 2021 Virtual website.
- If you have other questions and require any assistance, please feel free to email <u>secretariat@apvrs.org</u> or drop us a message at the live chat box at the congress <u>support centre</u> during the congress service hour. Service Hour:
 - December 11, 2021 (Sat): 11:00 23:00 (GMT+8)
 - December 12, 2021 (Sun): 11:00 20:00 (GMT+8)
